

Project Name : Pinterest using Ruby On Rails

Name : Radhesham Nagare

RollNo : R19112031

Github : <https://github.com/radheshamnagare/Printerest-clone.git>

Objective : To develop a own system like Pinterest . It helps store images according to the pin .The project uses Ruby On Rails framework.

Need and Relevance :

Pinterest marketing is a set of tactics that incorporate Pinterest into your business's bigger social media marketing strategy to reach new audiences and grow awareness for your brands and products.

- Reach a new audience and grow an online presence.
- Drive more traffic to the business's website or online store.
- Encourage conversions like newsletter sign-ups, ticket sales or purchases.

Significance :

- The System is easy to implement in any existing organizational system.
- The System can be easily used with mobile,desktop.
- The system restricts access to those who are not authorized users.

Workflow :

- **Authorization** : Through some credential users can create their own account and any activity will be a respective user account.
- **Collect Images** : users will upload images and there is a collection of images. We can use it for social media or business purposes or anything you need .There is a great collection of each user.
- **Search** : we can search images according to the best fit.
- **Save Images** : We can also save images with respective account credentials.

Expected Outcome :

- Reach a new audience and grow an online presence.
- Will get a great Collection of images.

Facilities Required:

- Active_storage
- Active_storage_validators
- Device
